

LOCAL PARTICIPATION IN SHELTER CONSTRUCTION

Output indicator

Indicator Phrasing

English: number of local people involved in voluntary or paid work on shelter (re)construction

French: nombre de personnes locales impliquées dans un travail bénévole ou rémunéré pour la (re)construction d'abris

Spanish: número de personas de la localidad que participan en trabajos voluntarios o remunerados en la (re)construcción de refugios

Portuguese: número de pessoas locais envolvidas em trabalho voluntário ou pago para a (re)construção de abrigos

Czech: počet místních lidí zapojených do dobrovolné či placené práce na (re)konstrukci přístřeší

What is its purpose?

The indicator assesses the number of people from the affected communities who were engaged by the assisting agency in the physical work required for (re)constructing shelters, both on a paid or voluntary basis.

How to Collect and Analyse the Required Data

1) Review the available documentation on workers' either paid or voluntary work. If the data is missing, interview the staff responsible for the shelter (re)construction and request that s/he provides the required data (do your best to also verify it from other resources).

Disaggregate by

[Disaggregate](#) the data by gender.

Important Comments

1) **Report separately** on the number of people who i) were paid for their work and ii) participated on a voluntary basis.

2) Assess and report i) the **average income** a paid worker earned; and ii) the **total amount** the project paid to the workers (the data is important for assessing the economic benefits of your intervention).
