PERCEPTION OF WASH NEEDS

Impact indicator, Outcome indicator

Indicator Phrasing

English: % beneficiaries considering that their basic WASH needs are met

French: % de bénéficiaires considérant que leurs besoins de base en matière d'EHA sont satisfaits

Spanish: % de beneficiarios que consideran que sus necesidades básicas WASH están cubiertas

Portuguese: % de beneficiários que consideram que as suas necessidades básicas de água higiene e saneamento (WASH) são atendidas

Czech: % příjemců pomoci uvádějících, že jejich základní potřeby týkající se bezpečné vody, sanitace a hygieny jsou naplněny

What is its purpose?

This sub-indicator was designed by ECHO as a part of its Key Outcome Indicators (KOI). It measures the proportion of the target population who perceive that their most essential WASH needs were met.

How to Collect and Analyse the Required Data

Collect the following data by conducting individual interviews with a representative sample of your target population:

RECOMMENDED SURVEY QUESTIONS (Q) AND POSSIBLE ANSWERS (A)

Q1: *Is the amount of water you can access sufficient for drinking, cooking and the most basic hygiene needs?*

A1: yes / no

Q2: *Do you have access to safe toilets?*

A2: yes / no

Q3: *Do you have access to the most basic hygiene items, such as bathing and laundry soap?*

A3: yes / no

To **calculate the indicator's value,** divide the number of respondents who replied "yes" to all three questions by the total number of respondents. Multiply the result by 100 to convert it to a percentage.

Disaggregate by

[Disaggregate](#) the data by gender and specific vulnerable groups, such as people with disability.
