SUCCESSFULLY ADOPTED SOCIAL PROTECTION INNOVATIONS

Impact indicator, Outcome indicator

Indicator Phrasing

English: number of social protection innovations successfully adopted by the social protection system

French: nombre d'innovations en matière de protection sociale adoptées avec succès par le système de protection sociale

Spanish: número de innovaciones de protección social adoptadas con éxito por el sistema de protección social

Portuguese: número de inovações em proteção social adoptadas com sucesso pelo sistema de proteção social

Czech: počet inovací, které byly úspěšně začleněny do systému sociální ochrany

What is its purpose?

The indicator assesses how many new services, approaches, or other innovations were successfully adopted by the social protection system.

How to Collect and Analyse the Required Data

Collect the following data by using the following methodology:

1) **Pre-define the criteria** of an innovation being "successfully adopted by the social protection system". For example, new services or approaches can be considered as adopted if an official social protection actor includes them in their planning, allocates required funding and starts using them (ideally for a certain period of time).

2) **Assess whether the pre-defined criteria were met** by reviewing relevant documentation and conducting interviews with the concerned personnel.

3) **Calculate the number** of innovations which met the pre-defined criteria (i.e. were officially adopted).

Important Comments

1) Consider also assessing **how many people benefit** from the adopted innovation and what its **actual benefits** are.
