

MEAN LEVEL OF HOUSEHOLD AIR POLLUTANTS

Indicator Phrasing

English: mean level of [specify the pollutant] in the target households

French: niveau moyen de [précisez le polluant] dans les ménages cibles

Portuguese: nível médio de [especificar o poluente] nas famílias-alvo

Czech: průměrná hodnota [uvedte znečišťující látku] v cílových domácnostech

What is its purpose?

The indicator measures the average levels of a given pollutant across the monitored households.

How to Collect and Analyse the Required Data

Determine the indicator's value by using the following methodology:

1) **Follow step 1 - 6** described under [this indicator guidance](#).

2) To **calculate the indicator's value**, work out the sum total of the pollutant levels recorded in each household and divide the result by the total number of households where the measurements took place.
