

MEAN LEVEL OF AMBIENT AIR POLLUTANTS

Indicator Phrasing

English: mean level of [specify the pollutant] in the ambient air in the targeted areas

French: niveau moyen de [précisez le polluant] dans l'air ambiant dans les zones ciblées

Portuguese: nível médio de [especificar o poluente] no ar ambiente nas áreas-alvo

Czech: průměrná hodnota [uvedte znečišťující látku] v ovzduší v cílových oblastech

What is its purpose?

The indicator measures the average levels of a given pollutant in the monitored areas.

How to Collect and Analyse the Required Data

Determine the indicator's value by using the following methodology:

1) **Follow step 1 - 4** described under [this indicator guidance](#).

2) To **calculate the indicator's value**, work out the sum total of the pollutant levels recorded in each area and divide the result by the total number of areas where the measurements took place.
